

DECARBONIZING DEGREASER DETERGENT

SUGGESTIONS

It is recommended to avoid the contact with aluminum surfaces and alloys, that are sensitive to alkaline products.

DESCRIPTION

It is very hard to remove charred dirt anchored to surfaces without the use of high degreasing power products. ALLPLAC is a high effectiveness decarbonizing degreaser detergent for the cleaning of cooking plates, baking molds, ovens and burners. High alkalinity product that contains nonionic surfactants with high degreasing power and pronounced wetting effect which make the product recommended for the removal of tougher dirt layers.

Specific for removal of carbonizing residues, old dehydrated drippings layers and greases anchored to surfaces. Suitable for canteens kitchens, hotels, restaurants, pastry ovens and fry shops.

DECARBONIZING DEGREASER DETERGENT

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Clear liquid
Colour	Brown
Fragrance	Light characteristic
Specific weight	1.390 ± 0.01 g/ml
Solubility in water	Complete in all ratios
pH	13 - 14
Chemical properties	Nonionic

FOAMING POWER

Moderate

AVAILABLE PACKAGING

6 kg container (2 pieces carton) - single product code - 016alpl0006

USE MODALITY

Dilute the products at 10-20% according to the type/quantity of dirt.
Spray the solution on the surface of hotplates (40°-50° maximum) and leave to work for 10/15 minutes. Then, remove the dirt using, if necessary, a brush or spatula, and eliminate the residue with a sponge cloth. Rinse.

For small, particularly dirty items, soak overnight them in the product solution.

FOR PROFESSIONAL USE ONLY.

The product maintains its properties when properly stored in an unopened package, in a cool and dry place away from light and heat sources, at a temperature between 5°C and 35°C.
